OBJECTIVE

- Looking for new opportunities to learn and evolve while delivering high quality code and products.
- Enjoy getting involved in diverse and challenging projects where I can contribute with ideas and resolve real world problems.

PROFILE

- Passionate programmer, with experience the full stack, the whole process of creation, knowledge of different languages and technologies.
- Effective analysis and abstraction abilities – has multiple solutions for a single problem and can chose the one which brings best value.
- Adept of website optimization principles for maximum speed and scalability
- Makes quick adjustment to new challenges and can work under pressure

WORK EXPERIENCE

Snipermed/Self Employed — Full Stack developer

2015 - PRESENT

- After working with a large range of technologies and stacks I decided to focus more on Ruby on Rails and start-up area.
- Made a series of projects including one MVP for financial application designed for a client in US. Used best practices, thorough testing to make the app secure, scalable and easy to maintain and update.
- Worked on other projects with clients from Freelancer, BrandHoot, eLance, other local clients also some personal projects as well. My work involved both front-end and back-end development of websites, apps, even building tools and Linux server administration - the full life cycle: development, deployment and maintenance.
- Technologies used : Ruby , Ruby on Rails, PostgreSQL, jQuery, GitHub, Atlassian Bitbucket, Amazon S3, Omniauth integration to Facebook, Twitter

Stratec Biomedical — .NET software developer

2012 - 2015

- Implementation of requirements, bug fixing, performance optimization at the database, data abstraction and data access layers.
- Creation and maintenance of unit and integration tests

SKILLS

Ruby and Rails

- Experience: 1.5 years
- Developed apps in production
- Testing TDD, BDD
- Deployment
- DRY, KISS, Query optimization
- CoC, don't reinvent the wheel.

Web Technologies

- HTML/CSS
- Javascript, JQuery
- SASS/LESS
- AngularJS, Laravel
- Bootstrap
- PostgreSQL, MySql

Others

- Amazon AWS, Digital Ocean
- Website speed optimization
- .NET Framework
- git source control
- Photoshop/Gimp
- Nginx, Apache2, CLI

LANGUAGES

English - advanced

German - intermediate

Romanian - native

- Used build server with Jenkins for continuous integration
- Working within the Microsoft technology ecosystem, using .NET Framework 3.5 - 4.5.1, SQL Server 2008 - 2012, C#, WPF, WCF, Entity Framework 4 - 6, LINQ, ADO.NET and Windows Forms.
